

VA-SEN

This sound level sensor measures the ambient noise level in a zone.

The VoiceArrest™ sound masking system is equipped with an adaptive adjustment system. The ambient noise in a zone is measured, and the masking sound level is adjusted based on this measurement.

The VA-SEN sound level sensor measures the ambient noise level in a zone. It is installed through a 9.5 mm (3/8") hole in an acoustic tile. In the case of an open ceiling, it can be fixed to the structure.

Typically one sensor covers 1,000 sq. ft., and up to 8 sensors can be installed in one zone.

Features

- Back electret type designed for high resistance to vibrations, high signal-to-noise ratio.
- High sensitivity type.

Specifications:

Sensitivity:	-35±4 dB (0 dB = 1V/pa,1 kHk)
Directivity:	Omnidirectional
Frequency Range:	20–20,000Hz
Diameter:	3/8 in.
Length:	2¾ in. approx.
Standard Operation Voltage:	3 volts
Current Consumption:	Max. 0.5 mA
S/N Ratio:	More than 62 dB
Measurement Range:	35 to 95 dB at 17 mV/Pa
Connector Type:	BNC
